SafeLink edge gateway · Multi-port HSIA appliance

1. ABOUT THE COMPANY

SafeLink is an enterprise High-Speed Internet Access (HSIA) and captive portal platform built for real-world guest and staff connectivity. We help organizations deliver reliable WiFi access without compromising security, branding, or day-two operations.

From branded captive portals and PMS-aligned guest journeys to multi-vendor WiFi, bandwidth policy, compliance logging, and NOC reporting—SafeLink gives hospitality, healthcare, education, and multi-site teams one place to onboard users and run networks at scale.

2. MISSION, VISION & VALUES

MISSION

Empower hotels, hospitals, campuses, and enterprises with HSIA tools that make guest WiFi secure, branded, and simple to operate—from first login to compliance reporting.

VISION

Become the trusted HSIA platform for multi-site organizations worldwide—where every property delivers a consistent, secure, and revenue-ready connectivity experience.

VALUES

- Trust & transparency
- Guest & staff safety first
- Operational reliability
- Continuous innovation

3. PRODUCT PORTFOLIO

SafeLink edge gateway hardware · ETH0–ETH3 · Fanless industrial design

HSIA Bandwidth Management

Throughput limits, time and volume quotas, and fair-use rules by site and user class.

Captive Portal Management

Branded guest journeys, access policies, and compliance-aligned onboarding.

WiFi Analytics Platform

Sessions, utilization, and trends for operations and capacity planning.

Subscriber & User Plan Management

Plans, vouchers, and entitlements enforced consistently across properties.

Wireless LAN & WAN Visibility

Path health, multi-WAN context, and access-layer signals in one view.

Managed Network Operations

Multi-site configuration, governance, and service workflows.
